Office 365 comparison

Why choose Logosnet over Office 365...

Local Technical Support

Office 365 technical support centres are located outside the UK, and with time differences etc. queries are not dealt with quickly. Our technical support is based in the UK and is available 24/7, so we are able to provide quick solutions.

Data Is Stored Locally

With Office 365 data is stored in a number of locations all over the world. With Logosnet you can be safe in the knowledge that your data is stored securely under the UK Data Protection Act.

No Minimum Contracts

With Office 365 you must sign up to a minimum 1 year contract. With Logosnet users have one simple pay-as-you go system.

Costs Always Remain The Same

At Logosnet we never move the goal posts – our costs are fixed. There is some speculation regarding a price increase from 365 (although this has not been officially confirmed).

You Only Deal With Your IT Support Company

With Office 365 you have to sign-up, agree T&C's and delegate access rights to your IT support company via your own online system. With Logosnet you only deal with us, making it as easy and hassle free as possible.

Reduced Monthly Outgoings

Although Microsoft offer additional services as part of their 365 package, this means that your monthly outgoings are higher and that you will be more than likely paying for programmes that you are not using. Office products can be purchased for as little as £50 outright, so you are able to reduce your fixed costs.

One Package Suits All

With 365 there a variety of different, complex packages. With Logosnet everyone is treated the same – there are no lengthy and complicated package options to review.

You Don't Get Lost In The Crowd

Large corporates such as Microsoft view their clients as a number, and users often get 'lost in the crowd'. With Logosnet each and every one of our customers count.
